Rita Marin

If antibiotics aren't
necessary, why allow it!
Aren't we consuming
enough chemicals simply
breathing the air?
I'm often unpleasantly
surprised at how nonsensical
this government can be.
We have people working to

As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

The contents of NAI are not intended to provide personal medical advice, which should be obtained from a qualified health professional.
